

PhlexTMF+

Full-service TMF management

Expert end-to-end Trial Master File (TMF) management from a single global provider

PhlexTMF+ provides a one-stop, full-service solution that encompasses all the software and services required for effective TMF management and ongoing inspection readiness. Organizations can be confident that their Trial Master File is being managed by experts every step of the way, from planning and document processing through quality review and study closeout.

With PhlexTMF+, life sciences organizations gain easy access to the latest eTMF software as a service (SaaS), expert guidance, and best practices that enhance TMF quality, completeness, and timeliness—all from a single provider.

Key benefits of PhlexTMF+

- Confidence that your TMF is being managed by industry experts, delivering the consistent quality, completeness, timeliness, and oversight necessary to achieve and maintain compliance
- Rapid implementation of comprehensive TMF management with minimal customer effort, thanks to a standardized and proven methodology built on thousands of successful Trial Master File projects
- Cost control and budget predictability through a fixed-priced model that includes everything required for complete and effective TMF management, from industry-proven SaaS eTMF software to expert TMF services
- Ongoing access to advanced technologies such as artificial intelligence (AI), together with TMF best practices such as risk-based quality control, embedded quality review, and completeness heatmaps

Why companies trust their Trial Master File to Cencora

Global inspection expertise

20 years' experience supporting customers through hundreds of inspections

TMF innovation

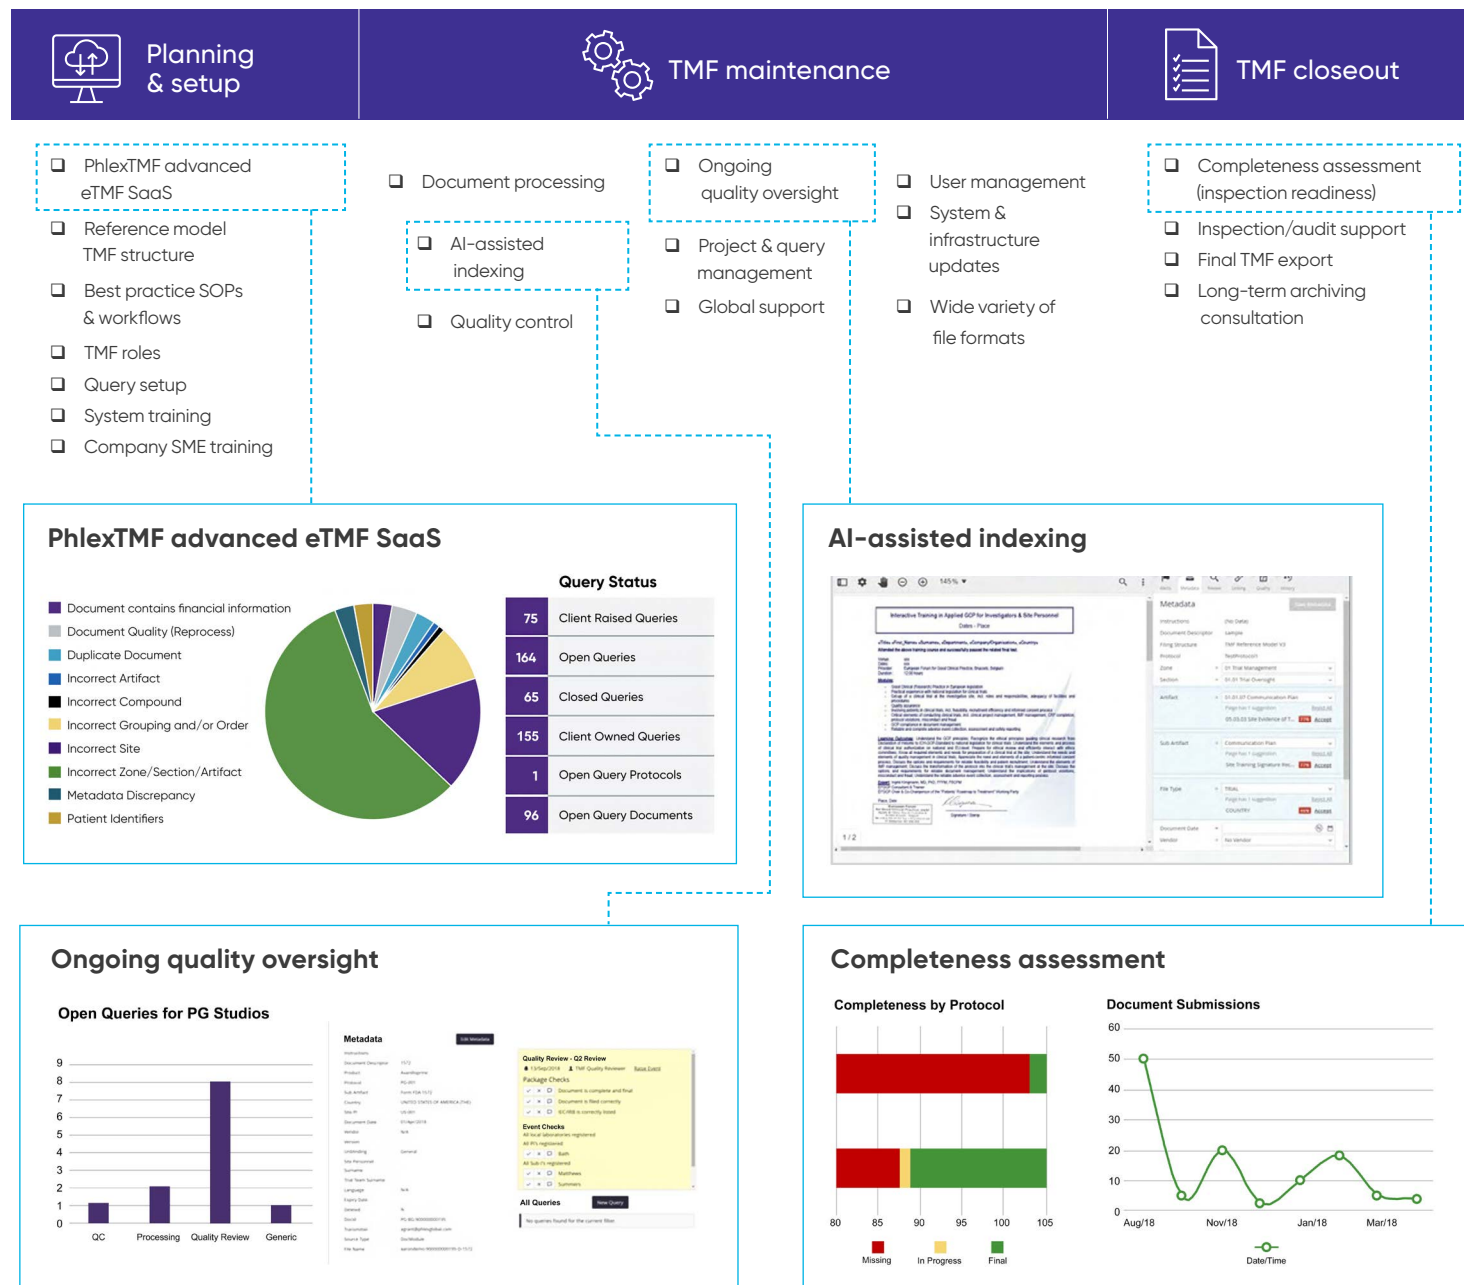

Leading expertise combined with the latest technology innovations make TMF management faster, better, and easier

Improve TMF management with less effort and at a fixed cost

PhlexTMF+ includes everything critical to TMF health, managed for you by our experts

Building on decades of industry experience in Trial Master File technology and best practices, PhlexTMF+ standardizes end-to-end TMF management to help improve quality, consistency, and efficiency throughout the TMF life cycle.

PhlexTMF+ fits each organization's unique requirements, providing agile, fit-for-purpose TMF management, eliminating the need to pay for software and services that don't support TMF health.
