

Contract Pharmacy Designation with Claims/Encounter-Level Data Collection Policy

May 6, 2026

Dear Covered Entity:

Effective July 1, 2026, Amphastar will permit a covered entity lacking an entity-owned pharmacy to select and utilize a single, designated contract pharmacy location to dispense their 340B products. The contract pharmacy must be registered as an active contract pharmacy location of the covered entity in the Office of Pharmacy Affairs Information System (OPAIS) database and then designated in Truzo®.

In addition, Covered Entities will also be required to provide specified claims/encounter-level data elements (CLDE) within forty-five (45) days of the date of service for contract pharmacy dispenses of Amphastar's products. The required data elements are detailed in **Exhibit B** of this policy document and are crucial to support program integrity and effectively reconcile 340B transactions.

Kalderos will begin handling Contract Pharmacy management and claim/encounter level data collection on behalf of Amphastar Pharmaceuticals, Inc. ("Amphastar") for all products listed in **Exhibit A**. All contract pharmacy designations and data submissions will be managed in the Truzo by Kalderos platform.

Starting today, Covered Entities can go to GoTruzo.com to register and complete the requirements outlined in this policy. Additional details, including instructions for and use of the Truzo platform will be shared by Kalderos.

Sincerely,

Amphastar Pharmaceuticals, Inc.

Frequently Asked Questions (FAQs)

1. *When should I start submitting claims?*

Covered entities are required to start submitting claims for contract pharmacy 340B utilization on the effective date of the policy, which is July 1, 2026.

2. *What kind of claims will I need to submit?*

The scope of this policy encompasses all 340B utilization of Amphastar's products occurring at designated contract pharmacy locations. This includes dispenses processed through a medical or pharmacy benefit (claims), as well as any dispenses processed as cash, patient assistance programs, or charity care (encounters).

3. *How often will I need to submit claims?*

You can submit your claims at a cadence that works for you, so long as it is within 45 days of the date of service. To minimize the effort required to assemble the submission, we have found that most covered entities prefer to submit claims at least twice a month.

4. *Which products are subject to Amphastar's Policy?*

This policy applies to all products listed in **Exhibit A**.

5. *How often can I update my contract pharmacy designation?*

Unless there is a material change to the eligibility status of a designated contract pharmacy, covered entities will be permitted to update their contract pharmacy designation annually, based on the initial date of designation. As a result, barring any change to the eligibility status of your designated contract pharmacy, you will be able to update your contract pharmacy designations on July 1, 2027 or one year from the initial designation, whichever is later.

In the event that something changes with the eligibility of your designated contract pharmacy, please contact Kalderos' Covered Entity concierge team for assistance.

6. *Does Amphastar require designated contract pharmacies to have a HIN assigned?*

Yes. A contract pharmacy must have a HIN in order for a 340B covered entity to designate it as its single contract pharmacy location.

7. *If the contract pharmacy my covered entity wants to designate does not have a HIN, how does my entity get one?*

Amphastar will not register a HIN on your behalf; if you need guidance or more information on how to get a HIN assigned to the contract pharmacy your entity would like to designate, please reach out to your wholesale distributor.

8. *How long does it take for my covered entity's designation of its single contract pharmacy location to take effect after?*

Any designation made prior to July 1, 2026 will be reflected in eligibility data starting July 1. After July 1, 2026, it may take up to 10 business days following designation for wholesalers to update their eligibility data.

9. *Can a child site designate a single contract pharmacy?*

No. All child sites must utilize the parent site's contract pharmacy.

10. *What do I need to do if I don't use a Contract Pharmacy?*

Nothing. No action is required.

11. *Will I be charged any fees for using Truzo?*

No. There are no fees associated with your covered entity's use of Truzo.

12. *If my state has passed laws prohibiting either contract pharmacy restrictions and/or requirements around the submission of claims data not required under federal law, am I subject to the policy?*

Amphastar understands that state and federal requirements related to contract pharmacy arrangements and claims data submission continue to evolve and may vary across jurisdictions. Covered Entities are responsible for ensuring their own compliance with applicable laws, regulations, and manufacturer policies.
